

Dear Hologic Customer,

As a valued Hologic customer, you have our commitment to provide you with the highest quality customer service, product support and technologically advanced products. We pride ourselves in being the leading manufacturer of Women's Health products, a goal that could not be achieved without customers like you.

The MIMS-PLUS with PowerEdge 2800 computer model was offered as a DICOM conformant archival device (storage library) designed for use within a PACS. Our records indicate that your facility has purchased a MIMS-PLUS with a PowerEdge 2800 computer. Unfortunately, the increasing scarcity of replacement components for the Mammography Information Management Solutions (MIMS-PLUS) with PowerEdge 2800 computer model makes it difficult for us to support this system.

After careful consideration, because of decreasing parts availability, it is necessary to declare End of Life on the MIMS-PLUS with PowerEdge 2800 computer, a system that was first offered in October 2005. We will continue to provide phone support, onsite service support, and materials based on the availability of replacement parts. Every effort will be made to service our current customers through June 30th 2013.

Hologic wants to continue its relationship with you into the future. Please contact your Account Manager to learn about our new archiving solutions, data migration services and pricing

We remain committed to providing our customers with the highest quality products and service and regret any inconvenience that this announcement may cause. For questions regarding service on your MIMS-PLUS product please contact Hologic Customer Support at 1 (877) 371-4372

Hologic offers a wide range of digital mammography solutions, for more information please visit our website, www.Hologic.com.

Sincerely,

A handwritten signature in black ink that reads "Agn D. Hill". The signature is written in a cursive, flowing style.

Roger Mills,
Sr. Vice President and General Manager, Customer Services
